ARA Consulting

Play a dynamic role within a cross-functional development team, contributing to the creation of Manufacturing Execution System (MES) solutions for various clients, using a multi-service architecture.

Key contributions:

- Developed React.js interfaces for seamless user experiences.
- Implemented scalable backend microservices with Node.js, Express.js, MongoDB, MySQL, and RESTful APIs.
- Secured authentication using JSON Web Tokens (JWT).
- Utilized Docker, Kubernetes, and GitLab CI for efficient deployment and automation.
- Conducted comprehensive testing with Jest and Supertest.
- Employed Prisma ORM for optimized data manipulation and querying.
- Used OPC UA communication protocol to get data from PLC and used it to calculate KPIs and other
